OASIS BERCO SOFT SOCIAL BOOTHS ARE "PLUG & PLAY"

If you've added LED lighting and/or a Power/USB/HDMI unit to your Soft Social Booth, an Advanced Power Strip (APS) will come installed in the enclosed ceiling of your unit. You'll simply install the power/USB unit in the sofa or table top (instructions provided), run the power cables for the lights and/or power/USB through the Booth walls to plug into the APS. The 12' cord from the APS runs from the ceiling through the wall and out through a grommet, leaving approximately 6' of cord to plug into your standard 120v wall or floor outlet.
